

This is in regards to KLOVE radio and the proposed LPFM stations.

1. KLOVE gives our family modern christian programming without commercials, ensuring we receive unbiased programming. As a military family, we travel and move often. With KLOVE broadcasting via satellite, we know we will almost always have a good radio station that we can depend on to listen to.
2. The biggest loss due to LPFM stations would be the lack of programming we want to hear. We financially support KLOVE in order to hear them all the way from Kansas City to about Warrenton on 96.1. Or when we were in CA, we recieved their signal from Sacramento to San Fransico. It is hard to find a good Christian station that is dependable.
3. The service provided gives an opportunity to hear not only Christian music but also wholesome insights into family life and problems. It is very annoying to turn on radio stations that play even classic rock or top ten and every other word is something I don't want to hear and that my 6 yr old son doesn't need to learn. Even the one local station that is ok, talks about subjects that children don't need to hear. I even don't want to hear it.

Please allow stations like KLOVE to broadcast so we have a real choice in programming. We do want them and we do support them financially.
